

PNS Community Forum User Set Up

1. Go to the PNS Communities Forum page, [here](#).
2. Log in using your PNS member credentials. If you do not know your username or password, please contact info@pnsociety.com. If you only need to reset your password, you may do so, [here](#).
3. Once logged in, you will see a first-time user prompt (see below). Click the blue button labeled 'Communities Profile' to proceed.

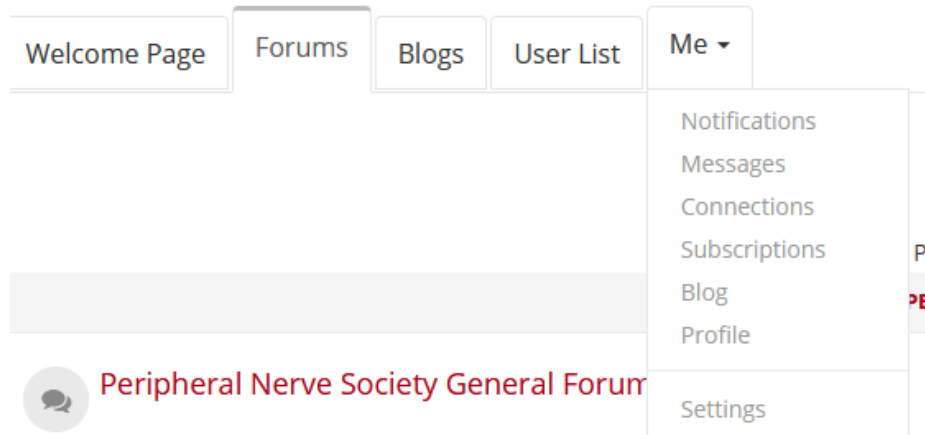

4. Next, complete your PNS Community Forum user profile. **We recommend setting your display name as your first name and last name.** This will make it easier for the PNS community to identify you. We also encourage you to **complete the profile fields** listed in the image below. You may **include specialty or area of interest** in the 'Interest' section.

The toggles at the bottom of this section may be adjusted to suit your preferences. You may adjust these preferences at any time from your user profile. **We recommend turning on the email notification settings so you can stay active and engaged with the threads you subscribe to.**

A series of five toggle switches for user preferences. The first toggle, 'Show my email in public profile', is currently set to 'NO'. The other four toggles, 'Display notifications', 'Send me an email when I receive a direct message', 'Send me an email when I receive a blog comment', and 'Subscribe me to threads to which I post', are all set to 'YES'. Below the toggles are two buttons: 'SAVE' and 'CANCEL'.

5. Once you have created your user profile, you will be routed to the PNS Community Forum landing page. From here, click the 'Me' tab and select 'Profile' from the dropdown to complete your profile setup.

We encourage you to **upload a high-definition profile photo**. You may click on the image of the person to upload your photo. From this screen you may also edit/update any of the fields in your profile by clicking the image of the gears in the upper right-hand corner (see below).
